

## MEDFORD WATER COMMISSION 2015 SYSTEMS DEVELOPMENT CHARGE

CITY: \_\_\_\_\_ DATE: \_\_\_\_\_

<b>PROJECT DESCRIPTION:</b> _____ _____			
Meter Size	# of Meters	SDC Fee / Meter	TOTAL
5/8" X 3/4"			\$
1"			\$
1 1/2"			\$
2" – R2			\$
3" – T2			\$
Total paid to Medford Water Commission:			\$

<b>MWC 2015 SDCs</b>	
Meter Size	SDC
5/8" X 3/4"	\$ 1,707.02
1"	\$ 3,755.44
1 1/2"	\$ 10,242.12
2" – R2	\$ 13,656.16
3" – T2	\$ 44,382.52

**Meters 4" and larger:** shall be based upon the actual demands the customer will place on the system.

The applicant will be required to supply the utility with their estimated Maximum Monthly Day (MMD) demand. The MMD shall be determined by dividing the estimated maximum month sales by 31, the number of days in the month.

MMD will be divided by 1,200 gallons to determine the number of Equivalent Residential Units (ERU) this demand represents. The number of ERUs is then multiplied by the System Development Charge (SDC) per ERU to determine the total SDC.

This estimated demand will be verified at 1, 3 and 5-year intervals to insure the proper fee has been collected.

Refunds or additional SDCs will be made or collected if the estimate provided by the applicant is inaccurate by more than 10%. The same method of determining SDCs will be used for large combined fire, domestic services.

Medford Water Commission – 200 S. Ivy St., Room 177, Medford, OR 97501
